info@AutismNRC.org

Dosage Chart for ANRC Essentials Plus Powder

ANRC Essentials Plus is unflavored so that the powder can be easily mixed with your favorite juice or other drink (we suggest orange, mango or cranberry). Give a sip of pure juice, then the vitamin/juice mixture, then pure juice. High-dose vitamins/mineral supplements have a strong taste, but in a published study of a similar vitamin/mineral supplement, over 95% of the children and adults were able to take the supplement successfully.

“Tastes like a fiesta in my mouth”
 - young boy with ASD in ASU research study.

Vitamins and minerals are normally consumed as part of the food we eat. Therefore, vitamin/mineral supplements should always be taken with food, not on an empty stomach, to reduce the risk of stomach upset.

We recommend starting at a low dose, and gradually increasing as tolerated.

The Adams et al. 2012 study found that this dosing was optimal for most participants, but some did better at 50-75% of the final recommended dosage. Adjust the dosage to what works best for your child.

Dosing can be 3x/day (preferred, since slightly better absorption) or 2x/day (almost as good).

Dosing can be 3x a day (preferred, since slightly better absorption) or 2x/day (almost as good).

ANRC Essentials Plus Powder Dosage Chart 3X DAILY	Days 1-7	Days 8-14	Days 15-21	Days 22-28	Days 29+
